We Make Cities & Companies Smarter

- Workforce Management
- Building Management
- Company Management
- Vehicle Management
- City Management
- Direct Sales & CRM
- Field Operations

VISUALIZE AND CONTROL ENTIRE CITIES

Current State Of Things

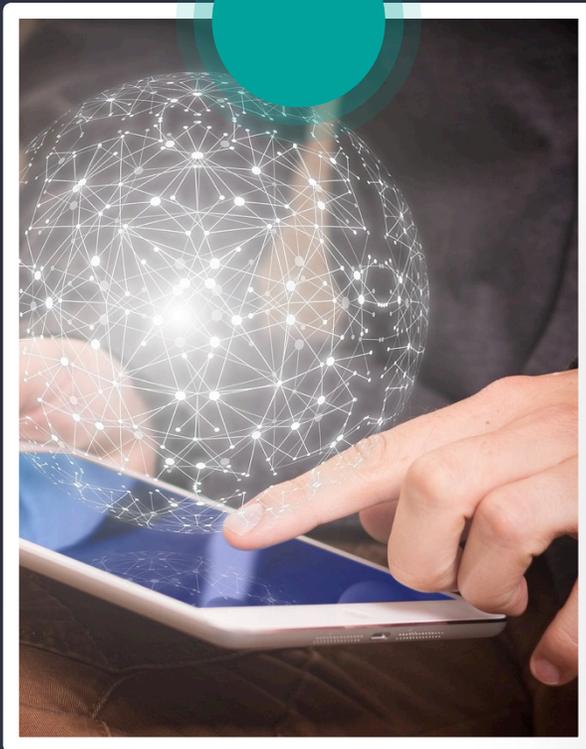

- The FinestGov technology currently services prestigious customers including the City of Jerusalem, Shell Oil, the King David Hotel / Dan Group and the entire Emergency Response System of Israel among others, and many of these sales were completed with virtually no spending on sales and marketing – “FinestGov Technology sells itself™”
- Has the capacity to service over a dozen untapped markets ranging from 5 Billion to 500 Billion USD each
- We estimate that it would take other companies up to 3 years to catch up
- Our “know how” is based on 15+ years of R&D and experience building modular holistic AI & mobile platforms across a number of industries

HIGH SECURITY PLATFORM AND DATA

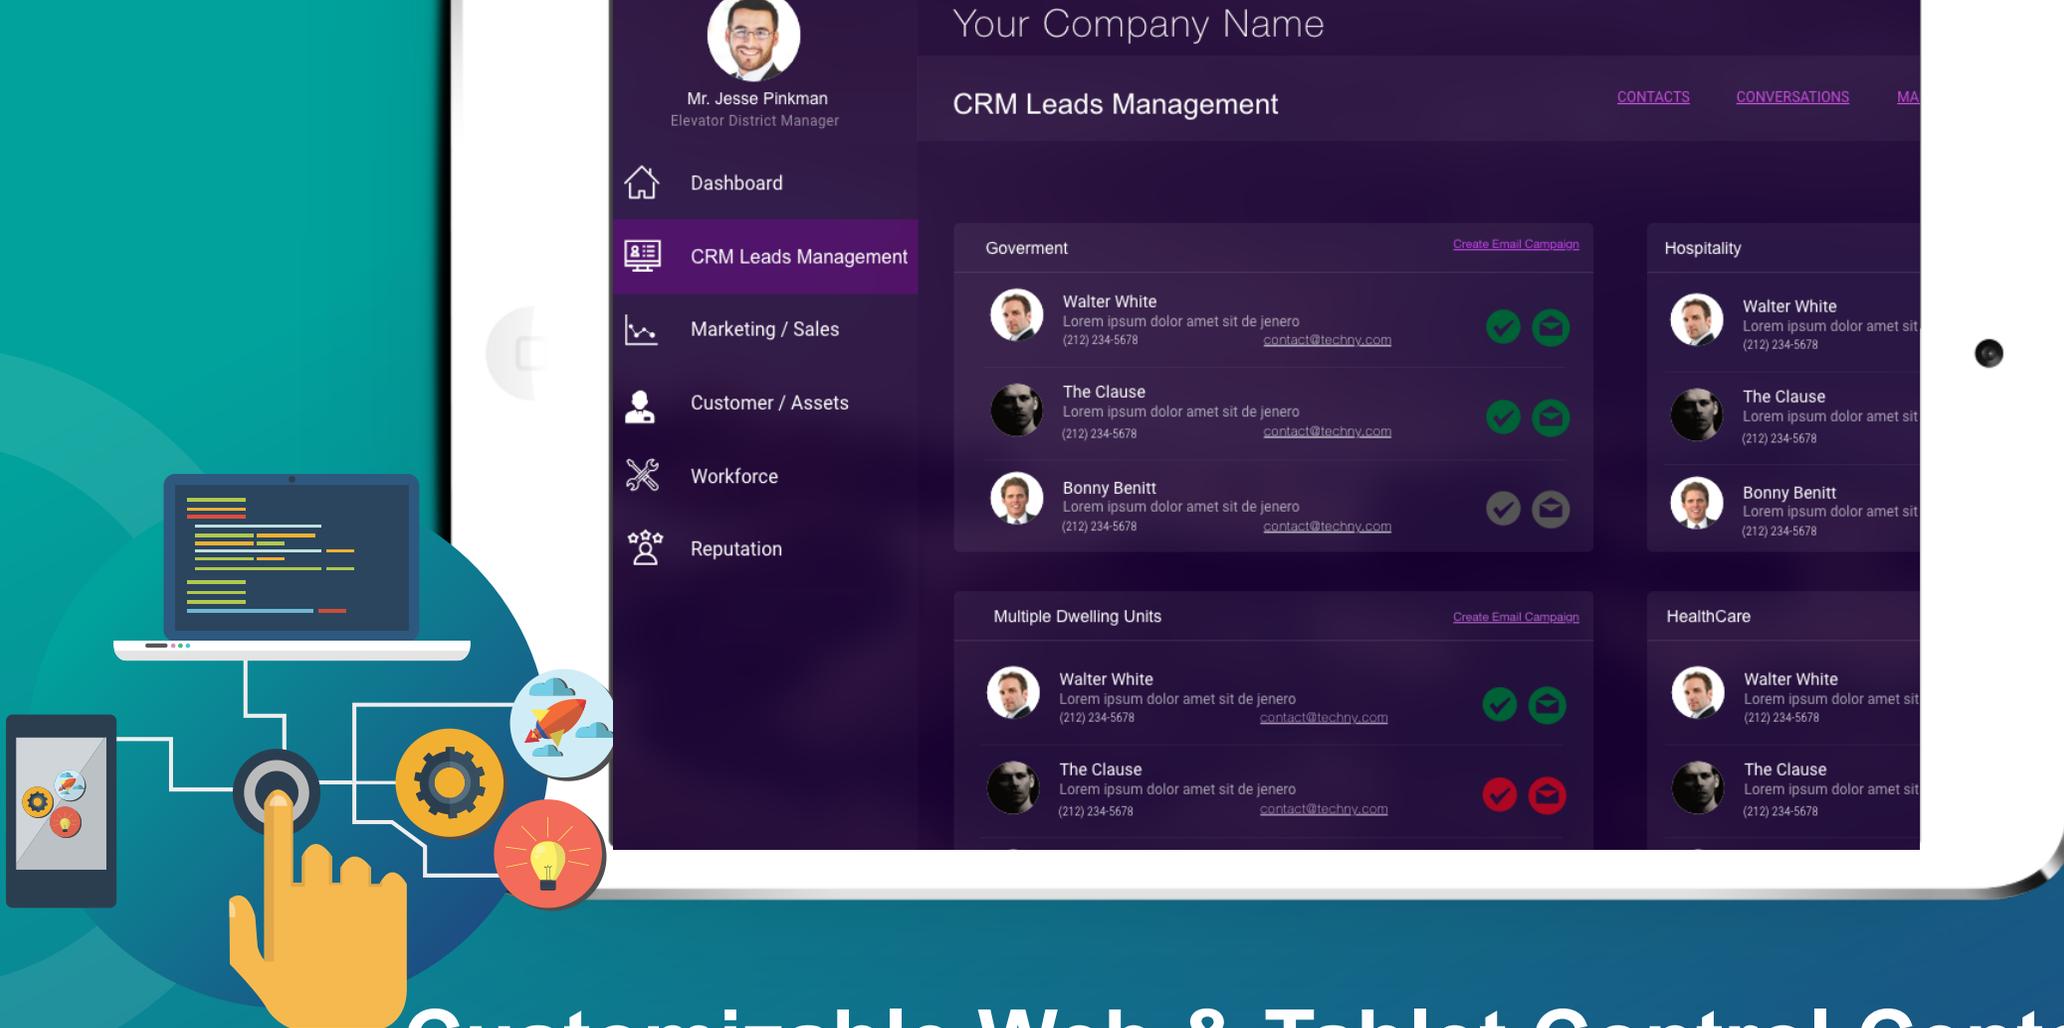

Winning Formula

01 Our technology is truly state of the art, and has proven itself to be the best, the most secure and the most effective affordable solution across a number of industries

02 The City of Jerusalem, Shell Oil and a few other security and value conscious customers have spent a year and a half looking for holes in our security and trying to find a solution that can offer them more value, and have chosen us

Customizable Web & Tablet Control Center

The FinestGov.com™ system is based on a data-cloud server and a mobile phone application on the side of the field worker user (which can be downloaded from one of the standard application stores to make onboarding extremely easy), and works on any device without requiring additional devices other than the workers existing phone or tablet.

We Deliver Above Competitors

Competition

The lack of a unified field workforce, transportation and asset management solution that is customizable, inter-operable between departments or across the entire organization, expandable and is easy and affordable to set up, use, improve and maintain

Our Solution

A workforce, transport and asset management solution that is easily, inexpensively and completely customizable for virtually any workflow and integratable with itself across other departments, and any other software solution and device for secure communications & monitoring

Impact On Your Business

Manage and Supervise

Our technology frees management from mundane tasks to focus on more important priorities

Flawless Compliance

Our AI notification and supervision system continually stays on top of all important aspects/issues of your everyday workflow and emergencies

Savings on Staffing

We turn every employees' and subcontractors' cell phone into a virtual supervisor and a powerful real time advisor for improved performance

Quality of Service

Increased quality of service & customer and employee satisfaction and retention

Operational Symbiosis Results In Significant Value For Everyone

Complete Smart Building Integration

- **Cross-platform & connectivity** via API allows the system to be interconnected to itself, to legacy systems and to other platforms and technologies (drones, enterprise servers, smart devices, smart buildings, security systems, sensors etc.) giving the customer access to their entire organization all in one interface
- **A set of powerful technologies** that we have identified that can lower the use of energy by 75%, while improving safety, security and comfort for tenants and owners

Our Technological Advantages

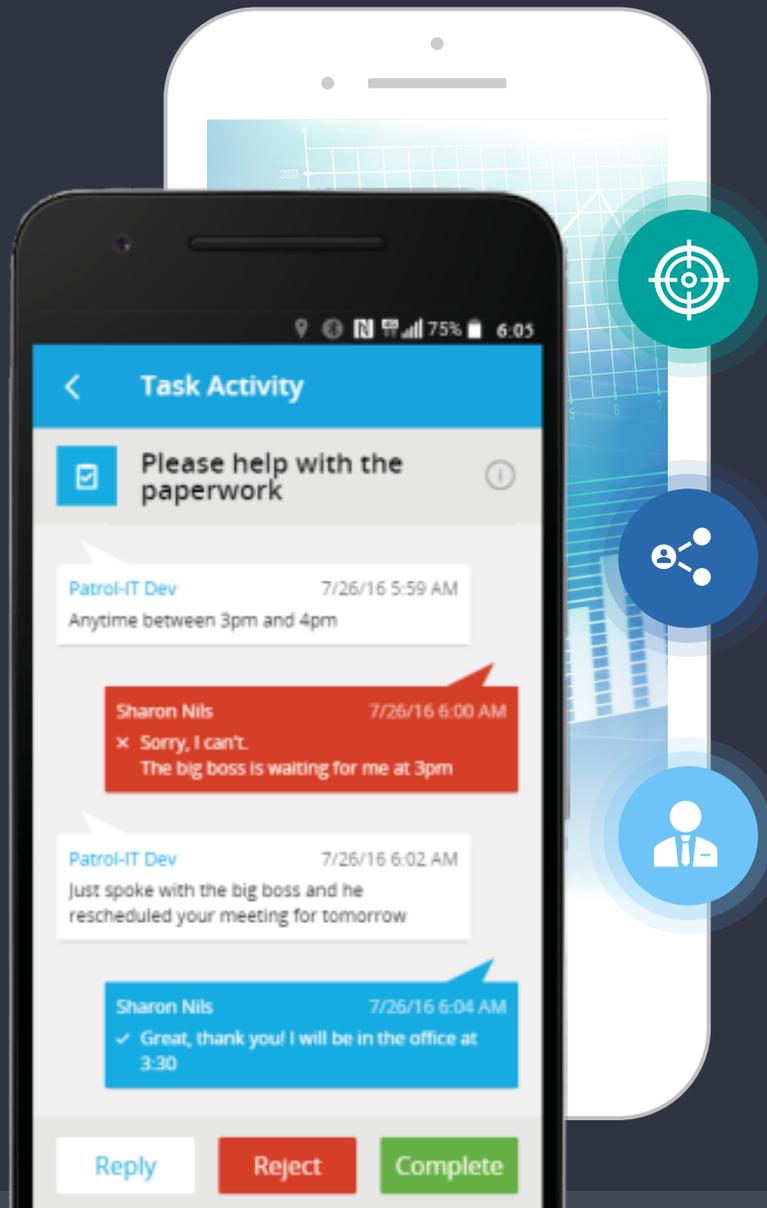

Customizable Sensor Connected Interfaces

During work hours, can connect to every sensor in the hand held device (optional) to see where all the employees are located (via GPS, NFC, Perimeter Sensors, etc), if the phone is on their body and if they are being active and a lot more, giving management an unprecedented ability to know what the employees are doing in real time and letting the management be notified when their people are slacking off or have walked off the job

Task Management

- ✓ Assignment of tasks in real-time – open ticket on the server / Mobile App, or by phone call, by operator, manager, employee or client
- ✓ Assign task to employees / groups “Uber” style or direct assignment - First employee accepting the task will handle it, or assign responsibility for guaranteed performance
- ✓ Shared tasks among several employees

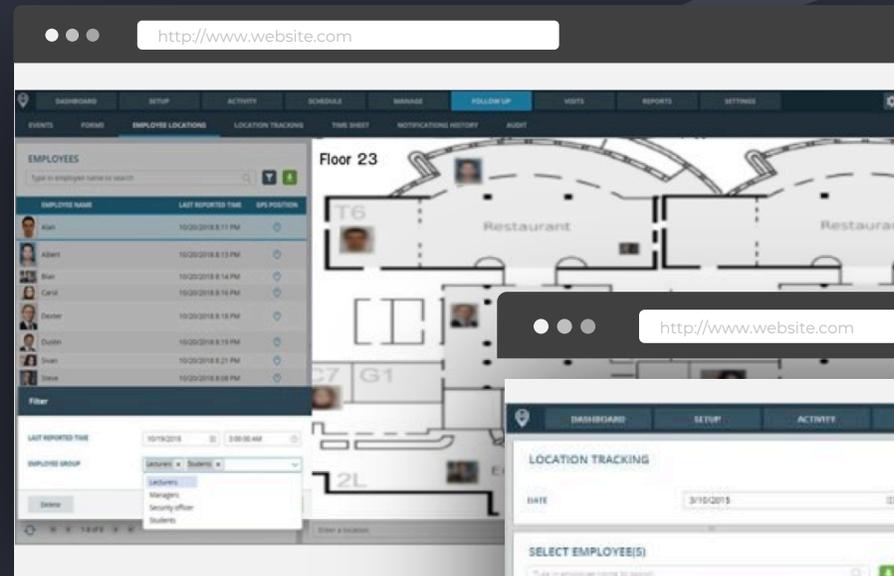

- ✓ Assign customizable / required forms / data collection for each task type, to fill up by the field worker
- ✓ Task-level chat between employees and customers, internally within entire department or across multiple departments
- ✓ Alerts & complaints pertaining to execution of assigned tasks
- ✓ Receive delayed / unaccepted task notifications. Completely improves manager workflow and frees up time from being notified about completed tasks

Tracking Employee & Asset Location In The Field

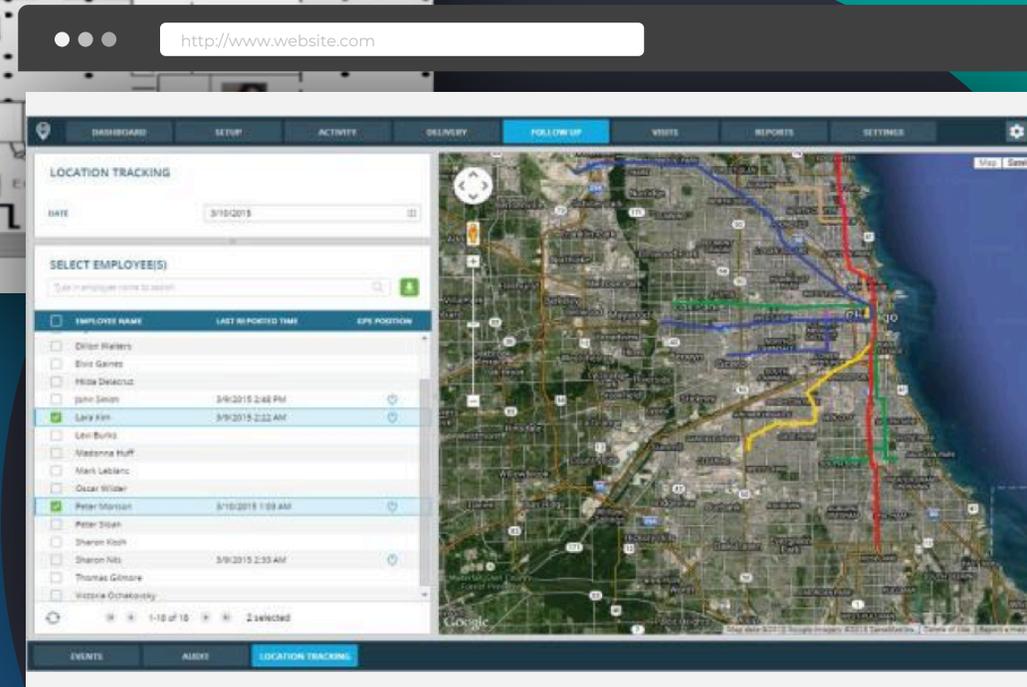

Full Breadcrumb Views, GPS, GEO Fencing, NFC, Mobile Network Tracking, Bluetooth, Camera Feed & Any Other Tracking Technology Implementation Possible

+ full audit trail

Tracking Employees in the Field

Tracking Indoor and Outdoor Location of Employees

Managing Field Workers

Operational Improvements & AI Assistant For Field Workers

Turn all of your employees' phones into an enhanced AIAssistant devices and significantly improve your operations

Description of Tasks

Detailed description of tasks & instructions, for improved performance

Assignment of Tasks

Assignment of tasks and change priority in real time – open ticket and service your most valuable and most important clients and cases first.

Recording & Audit

Recording and full audit of task fulfillment - ticket closed. Follow up and customer satisfaction review.

Alerts & Complaints

Alerts & complaints pertaining to improper or unusual execution of assigned tasks.

AI Notifications & In The Field Data Collection

Enhance the way in which you handle all data collection and knowledge management

Data Collection

Filling out forms and enforcing data collection before moving on to next part of the assignment

Signature Collection

Collecting signatures & Signing agreements in the field

Media Collection

All types of media collection (audio, video, photos) straight from the field onto the server

Verification of Documents

Allow office employees to verify correctly filled out documents or media before employees leave the worksite

Real Time Analysis

Getting signals and real time analysis of all sensors on devices feeding into the AI alert system

AI Notification System

Utilize AI continuous Notification system to keep track of and notify management and employees of all issues and events until they are resolved.

Smart Forms

- ✓ Create customized / standard forms for tasks, invoices, events, asset management visits and inspections
- ✓ Data Collection and Media Management Take multiple photos, Video, Audio Capture signature, Location and Device Information
- ✓ Scan a barcode
- ✓ Preserve form history for each location, visit and event
- ✓ Analyze form answers and generate analytic reports
- ✓ Notify managers by email, app alert or sms with the form attached
- ✓ Store complete audit trail blockchain

Problems With Competing Offerings

“EXPENSIVE” Million Dollar Implementations requiring significant upfront cash outlays & hundreds of dollars / hours for highly specialized experts to create custom solutions

“NON FLEXIBLE” Non Customizable Single Department / Industry solutions. Prevents multi department inter-connectivity and flexible single inter-operable solution for the entire organization

“NOT UPGRADABLE” Cannot be changed, tweaked & improved based on real world experience without expensive reprogramming

Our Competitive Advantage

Completely and easily customizable for any workflow by non-technical people

Industry Fact

If we are unable to educate the market about the higher value of our solutions, or if we cannot deliver simple-to-implement solutions that address such basic needs, we may be at a disadvantage when selling to these customers.

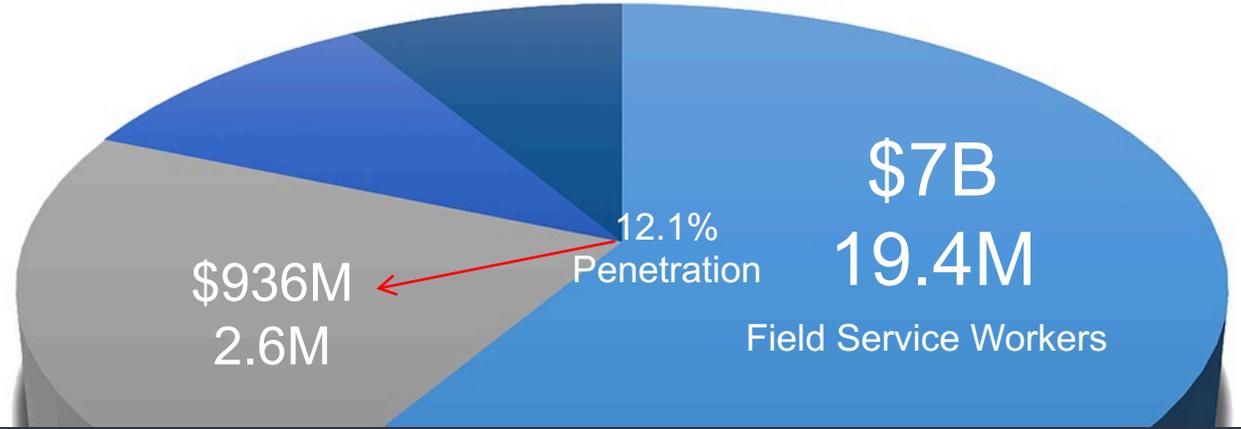

- *Click Software Annual Report*

Our Competitive Advantage

We are completely and easily customizable by non-technical staff for any type of workflow and multi department interconnectivity, communication, monitoring and assignment management.
